Online Learning Platform – Requirements Prioritization (MoSCoW + Kano)
Description
Prioritization of online learning platform requirements using two frameworks.
MoSCoW: Must have / Should have / Could have / Won't have (this release).
Kano: Basic (expected, dissatisfies if missing), Performance (more is better), Attractive (delighters), Indifferent (little impact).
Every child story carries labels MoSCoW-<Category> and Kano-<Category>, and its description gives the rationale. Filter by label to see each view.
